FRCR ACADEMY

For each case place a tick in **either normal or abnormal** column. Anatomical variants or minor age related changes are considered normal. For each abnormal case, enter a **single diagnosis** or abnormality. No marks will be allocated for a case where multiple diagnoses are given. Half marks can be given where the diagnosis is close, but not completely accurate / specific.

Case	Normal	Abnormal	Diagnosis / Abnormality (Only if abnormal)	Correct?
